

Jiffy® Steamboard

Worldwide Leader in Steaming
Equipment Since 1940

Now you can use your Jiffy® Steamer to do more than steam out wrinkles! The Jiffy® Steamboard provides you with a convenient workspace so that you may set pleats and creases easily. The board is ideal for home usage, clothing retailers and tailors.

The warm, moist steam combined with the touch of the steam head will allow you to remove wrinkles quickly and to crease garments easily – in the time-tested, safest, most efficient and gentle method available!

The Jiffy® Steamboard includes an eyehook screw and the Jiffy® Steamer Professional Garment Hanger to hold your garments. The professional garment hanger design works together with your Jiffy® Steamer to prevent unsightly hanger marks and to facilitate the steaming process. The hanger incorporates a rubberized coating that prevents garments from sliding off of the hanger. Non-slip adjustable coated clips for pants and skirts are also included. The solid steel construction hanger will last you a lifetime.

The Jiffy® Steamboard may be temporarily mounted by hanging the board over a door with the enclosed bracket. Or the Jiffy® Steamboard may be mounted directly to the wall using the enclosed screws.

Mounting Your Steamboard:

Door Brackets - Use the over-the-door bracket for convenience and versatility. The Jiffy® Steamer Steamboard can be left hanging or taken down and moved to another site or stored.

Wall Attachment - Fasten the Jiffy® Steamer Steamboard to your wall for a permanent mounting. Use the two pre-drilled holes at the top of the board for an easy installation.
